20th Floor
New York, NY 10001

PROFILE

Margaux represents both plaintiffs and defendants in high-stakes cases and class actions involving antitrust, intellectual property, and artificial intelligence. Margaux has in-depth experience litigating a wide variety of matters in the technology sector, including cases at the intersection of copyright and AI, representing software developers, authors, and other rights holders in pioneering litigation against major tech companies over the use of copyrighted works to train generative AI models.

An inaugural public interest fellow at the University of California, Irvine School of Law, Margaux regularly dedicates her time to social impact causes. She has drafted amicus briefs on gun regulation for organizations and successfully argued compassionate release motions for incarcerated individuals under the First Step Act.

EXPERIENCE

Margaux's recent experience includes:

- Representing a putative class of authors alleging copyright violations against Meta Platforms for pirating their registered works for use as AI training data for Meta's Llama Large Language Models
- Representing a putative class of authors alleging copyright violations against OpenAI for pirating their registered works for use as AI training data for OpenAI's Large Language Models
